SUMMIT credit logistics for smart state

# Karnataka Logistics Summit 2016

*Smart logistics for Smart State*

Karnataka is one of the high economic growth states in India with a targeted 12% industrial growth in the next few years. It has vibrant automobile, agro, aerospace, textile & garment, biotech and heavy engineering industries. The state has sector-specific SEZs for key industries such as IT, biotechnology, engineering, food processing and aerospace.

The new industrial policy lays emphasis on providing good infrastructure support for promotion of industries. It has proposed to form at least five industrial areas. The policy encourages private investment in establishing industrial areas and estates.

Karnataka is home to many big manufacturing companies like Kirloskar, ABB, Larsen & Toubro, Jindal, Kalyani group, TATA, Motors, TVS, Toyota, Scania, Volvo etc.,

## **Industrial corridors to get push**

The new industrial policy 2014-19, proposes to join the Centre in implementing the Chennai-Bangalore-Industrial Corridor and Bangalore Mumbai Economic Corridor with the help of assistance from Japan and UK. In order to take the maximum benefit from industrial corridor, the state has proposed four more industrial corridors, which will be in Dharwad-Koppal-Raichur, Chitradurga-Haveri-Karwar, Raichur-Bagalkot-Belgaum and Tumkur-Shimoga-Hassan sectors

The industrial corridors are expected to become the engines of economic and industrial development over the next 10-15 years. With this, the state proposes to spread out industries by creating industrial nodes along the corridor.

In this backdrop the first edition of **Karnataka Logistics Summit** will provide unmissable insights and analysis from leading speakers from government and industry through engaging, thought-provoking sessions.

In two business sessions, expert speakers will discuss key topics:

- Export/Import scenario in the state
- Industrial/manufacturing clusters and corridors
- Rail/Road connectivity to gateway Ports
- Logistics planning and Optimization of cost/Time
